AI/ML engineering student who ships end-to-end systems: agentic AI, retrieval-augmented generation (RAG), LLM fine-tuning, forecasting and computer vision, taken from dataset to deployed service. Twenty personal projects, eighteen with live demos.
Dean's Lister 2023-2026.

SKILLS

Languages: Python, SQL, JavaScript, Java, C, C++
AI/ML: PyTorch, scikit-learn, LLM Fine-Tuning (LoRA, QLoRA, Unsloth), RAG, LangChain, Agentic AI, Ollama, Transformers, CNNs, Computer Vision, Time-Series Forecasting, Model Evaluation
Data: pandas, NumPy, DuckDB, PostgreSQL, MongoDB, SQLite, MySQL, Tableau, Power BI
Backend & Tools: FastAPI, Node.js, React, Docker, Git/GitHub, GitHub Actions, ONNX, n8n, Kaggle
Cloud: Azure OpenAI, Google Cloud, Oracle Cloud, AWS, Vercel, Supabase, Firebase

PROJECTS

- YODA - Your Offline Data Agent**2026
- Tech: Python, Ollama, FastAPI, pandas, Agentic AI
- Built a local-first data agent that answers questions over CSV and Excel files with no data leaving the machine, running a local Ollama model behind a FastAPI service.
- Aegix AI - Contract Compliance Screening**2026
- Tech: Python, LangChain, Azure OpenAI, Vector Search, RAG, FastAPI
- Shipped a retrieval-augmented screening tool that flags non-compliant contract clauses and cites the source paragraph behind every flag.
- Refusal Calibration - LLM Fine-Tuning**2025
- Tech: PyTorch, LoRA, QLoRA, Model Evaluation, Python
- Fine-tuned a base model with LoRA so it refuses out-of-scope questions instead of answering them confidently.
- APAW - Dam Level and Spill-Risk Nowcaster**2025
- Tech: Python, River, Online Learning, Time-Series, GitHub Actions
- Deployed a self-updating forecaster that retrains on new Open-Meteo readings through a scheduled GitHub Actions job, running unattended.

EXPERIENCE

- ML Engineering Intern - FlyRank AI**2026 - Present
- Prepare and validate datasets, support model testing, and automate workflow steps in Python.
 - Build data pipelines and internal automation tools that cut manual handling out of the team's day-to-day work.

EDUCATION

- BS Computer Science, specializing in AI/ML Engineering - Our Lady of Fatima University**2023 - Present
- Dean's Lister 2023-2026, with placements in Python, Database Design and C Programming.

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate (Coursera, July 2026); Google AI Professional Certificate (Coursera, June 2026); AWS AI Practitioner (Udemy, June 2026); Building with the Claude API (Anthropic, 2026); Introduction to Model Context Protocol (Anthropic, 2026).
